

Eng-Com offers business development and technical services for the Engineering and Commercial sectors – hence our name. Energy Projects undertaken by David Peck include:

- International search for technology integration partners for an Australian fuel cell development company – subsequently employed as Business Development Manager responsible for international market analysis, product definition and field trials leading to early stage commercialisation. The outcome was development of micro-CHP systems for the European and Japanese domestic home markets and product development agreements with several water heater manufacturers. Field trials were conducted in New Zealand, Australia and Germany.
- Management of a regional business development group for the coal mining and engineering community in the Latrobe Valley, Gippsland, S.E. Australia.
- Export market facilitation for a large electrical firm resulting in long-term multi-million dollar sales to S.E. Asia and export awards from the Governor of Victoria.
- S.E. Regional representation for an interstate electrical/mining equipment manufacturer.
- Start-up Business Plan for a high-tech fibre-optics/electronics manufacturer focused on thermal monitoring of power cables– subsequently employed as inaugural CEO.
- Ausindustry accredited Business Network broker for a group of firms engaged in coal mining education, including visits to China to assist in promotion.
- Review of Australian Wind Energy opportunities for the Institution of Engineers, Australia – published in technology report to Federal Government.

David Peck – mini CV ([full CV available](#))
